SUMMARY

Final-year Software Engineering student seeking a Software Engineer role with a focus on AI applications. Currently completing industrial training at RHB Bank in Group Digital, contributing to RHB's Mobile Banking App integration proof of concept for MyDigital ID (MyDID), a digital identity verification platform, including API specification design and frontend implementation. I build across the full stack such as Go, React, FastAPI, AWS, with a track record of shipping AI-powered applications in hackathons and real client environments. Currently working towards the AWS Solutions Architect Associate (SAA-C03) certification.

EDUCATION

UNIVERSITI KEBANGSAAN MALAYSIA (UKM)

Oct 2022 – Present

Bachelor of Software Engineering (Information System) | MUET: Band 4.5

COLLEGE MATRICULATION SELANGOR (KMS)

June 2020 – June 2022

Physical Science | CGPA: 3.67

CERTIFICATION

In Progress

AWS Solution Architect Associate

Sept 2025

Apple App Development with Swift Associate

PROJECT (Final Year Project)

Finance Management App for B40 Entrepreneurs

Sep 2025 – Feb 2026

- Developed a voice-based web application using React to help youth and small entrepreneurs track daily sales, aiming to simplify financial literacy for 100 target users.
- Integrated LLM functions to extract key data (item, quantity, profit) from raw speech inputs, achieving an average data extraction accuracy of over 90% during testing.
- Designed a PostgreSQL structure capable of storing and aggregating monthly transactions for daily/monthly sales summaries, providing crucial business insights.

RELEVANT EXPERIENCE

RHB BANK BERHAD, GROUP DIGITAL

Software Engineering Intern (Industrial Training)

March 2026 – Present

- Designed and documented RESTful API specifications (OAS 3.0) for RHB's Mobile Banking App integration proof of concept, improving API clarity and handoff efficiency for the engineering team.
- Contributed to e-verification feature development and API polling integration for the proof of concept, supporting MyDID's integration with RHB's Mobile Banking App as a Single Sign On (SSO) login option.
- Collaborated in Agile sprints with cross-functional teams to deliver secure digital identity solutions.

Software Engineering Intern (Summer Internship Program)

June 2025 – Aug 2025

- Built an AI documentation assistant using FastAPI and LLM integration to process developer input into structured summaries, reducing manual documentation time by 40%.
- Created three Superset dashboards to visualize key metrics, including developer productivity and SonarQube quality scores, enabling management to generate weekly reports.

UNIVERSITI KEBANGSAAN MALAYSIA (UKM)

Web Developer, Faculty of Science and Technology (FST)

June 2026 – Present

- Built a web-based iPad equipment loan system for FST's Dean's Office, covering three shared learning rooms and a single pooled equipment inventory.
- Implemented a Supabase/PostgreSQL backend with magic-link authentication, row-level security, and a database-level exclusion constraint to prevent double-booking of equipment.
- Delivered and demoed a working MVP to faculty stakeholders.

- Built a mobile app for students to register with their college.
- Added a feature to help students locate their college via an AR map or a linked Google Maps location.

TECHNICAL SKILLS

Languages	: Java, Python, Kotlin, Dart, Swift, PHP, HTML, CSS, SQL, Go.
Frameworks	: Jetpack Compose, Flutter, FastAPI, Next.js.
Tools & Platforms	: Firebase, MySQL, Git, GitHub, PowerBI, Docker, PostgreSQL, Supabase, Postman, Bruno, AWS (EC2).
Soft Skills	: Leadership, Strategic Communication, Project Coordination, Agile Mindset.

AWARDS & HONORS

2026	2 nd place, Agents@RHB Hackathon 2026
2026	2 nd place, RHB MySiswa Brand Challenge 2026
2025	2 nd place, RHB Business Challenge 2025
2025	Best Facilitator Choice Award, Asean Youth Volunteer Program 2025

EXTRACURRICULAR INVOLVEMENT

AGENTS@RHB HACKATHON 2026

- Co-built BAC (Business Analyst Co-Pilot), a multi-agent AI compliance assistant on Microsoft Copilot Studio using Claude, cutting a moderate project's business-requirement workflow from ~53 days to ~30 days (23 days saved) by automating BRD drafting, process-flow mapping, risk/compliance flagging, and JIRA-format user story generation.
- Built a grounded knowledge base spanning 8 BNM regulations and 7 RHB internal guidelines (15 sources total), routed through a three-tier agent orchestra to produce audit-ready output matched to RHB's real templates.

RHB MYSISWA BRAND CHALLENGE 2026

- Built RHB GO, a student fintech web app featuring a verified GPS merchant discovery map, a student discount portal, and an AI chatbot, built with Next.js 14, TypeScript, Supabase (PostgreSQL + PostGIS), Mapbox GL JS, and the Claude API.
- Ran a primary survey of 160 students to validate the problem, finding 86.2% were unaware of existing card benefits, and used those findings to directly shape the product's positioning and features.

SEKODLAH TECHIVE 2026 (CIMB-Funded)

- Completed a 26-day CIMB-funded tech bootcamp covering AI, cybersecurity, data analytics, cloud computing, UI/UX, and network infrastructure, culminating in the 40-hour hackathon.
- Built the backend for C.A.R.I., an agentic AI career co-pilot, designing an Express.js/TypeScript API on Supabase where a Claude-powered planning loop diagnoses CVs against job descriptions and auto-tailors resumes on apply, with every AI-initiated action gated behind human approval before execution.

DERIV AI HACKATHON 2026

- Built an AI-powered trading coach Chrome extension, placing as a top 50 out of all submissions.
- Designed to assist traders with real-time insights and coaching prompts using LLM integration.

CURSOR X ANTHROPIC HACKATHON

- Built CAKAPnBAYAR to reduce order entry errors by 100% using Whisper ASR + Groq inference for real-time multilingual voice transcription (Malay-English code-switching), with sub-3-second validation latency.
- Designed to improve accessibility for non-verbal communicators and multilingual users while increasing worker productivity by eliminating manual order typing in F&B environments.

PERSATUAN MAHASISWA ANAK SELANGOR (PERMAS) UKM

Vice-President

- Directed the Fusion Arena sports event, coordinating logistics for 310 participants across physical and online formats over a 2-day period.
- Secured RM1,500 in sponsorship from multiple external partners by initiating pitch proposals and follow-up communication, exceeding the initial fundraising goal by 20%.
